This is a dummy file. Each system gets its own file.

Printing

To print out the system notes on regular paper, do the following.

1. Open system.md in the browser
2. Copy all of the relevant text to the clipboard and paste it into a word processor (e.g., Microsoft Word)
3. Change the page layout to landscape orientation
4. Set the columns
   - One-sided: set to three columns with spacing of 0.1" in between
   - Two-sided: change the page layout to "book fold"
5. Change the margins to narrow (0.5")
6. Select all of the text, reduce the font size by two clicks (Ctrl-<)
7. While the text is selected, set paragraph spacing to Single and 0pt before/after paragraph
8. Print
   - Two-sided: make sure it is set to flip pages on the short side of the page
